

AUTHOR: SUPERCHARGE BATTERIES PTY LTD

SUBJECT: NEW PRODUCTS

ISSUE: APRIL 2006

With its continued commitment to product excellence and meeting the growing requirements of the modern Australian market, SuperCharge continues to lead the market in releasing superior products to give its dealers and end-users a more powerful and more reliable choice.

MORE POWER FOR TRUCKS & HEAVY EQUIPMENT

SuperCharge has recently launched **4 new additions** to their truck and heavy equipment battery line-up.

Now available are the SuperCharge Gold Series **MFN150 and MFN200** - the **Fully Sealed Maintenance-Free** counterparts of the N150P and N200P. With the release of these 2 Gold Series batteries, SuperCharge has positioned itself to be the biggest among the very few distributors in Australia that offer true Maintenance-Free technology and convenience in this product

category. The availability of the MFN150 and MFN200 now gives the trucking, farming and mining companies a safer, more powerful, and more reliable product choice for their requirements.

Also now available is the new SuperCharge **N94P** Classic Series and its Maintenance-Free counterpart **MFN94** Gold Series designed to fit several specialised Truck and Tractors.

COMPLETING THE 'DIN' BATTERY FAMILY

SuperCharge is proud to release its **Fully Sealed Maintenance-Free, MF88H - 100 ampere hour rated DIN battery**. The MF88H strengthens and completes SuperCharge's European battery line-up ensuring that all DIN requirements of the modern Australian market are met. The MF88H meets the power requirements of several light commercial vehicles like the Mercedes Benz Sprinters and Vito Series. It is also the battery to fit several Top-of-the-Line European luxury and sport vehicle models. SuperCharge resellers specializing in the European market can now be confident that they have all the right batteries they need.

SUPERCHARGE YOUR LAWNMOWER

To meet the modern Lawn Application battery requirements, SuperCharge has launched the **U1 Series**. This battery is designed to meet the fitment and power requirements of most ride-on mowers. SuperCharge is offering the lawn application battery in Calcium-Calcium accessible, namely the **U1** and **U1R** and the Maintenance-Free versions, the **MFU1** and **MFU1R**.
